CTIA WIRELESS: OtterBox has the Toughest Cases for Tech

Fort Collins, COLO. – The International CTIA WIRELESS® show brings wireless advancements to life through a large-scale, interactive event in New Orleans, La. The mobile technology world will meet in celebration of innovation May 8-10, 2012 and connect thousands of enthusiasts with cutting-edge products from companies like OtterBox®, a manufacturer of protective cases for handheld devices. See the toughest cases for tech during CTIA WIRELESS from OtterBox in booth #2557.

OtterBox provides peace of mind to mobile technology users whose busy lives are naturally hazardous to technology. By creating premium custom cases that complement the look, feel and functionality of smartphones, tablets and eReaders, OtterBox protects both the technology and the lifestyle of its user. From installation to utilization, OtterBox cases provide a worry-free mobile experience.

DEFENDER SERIES®

Made for adventure, the Defender Series® sets the bar for mobile protection. Its multi-layered design has been acclaimed for providing reliable protection in unforgiving environments. A built-in screen protector, fortified polycarbonate frame and robust silicone skin defend the device from drop, dust and scratches. Most Defender Series cases include a holster-style swiveling belt clip that doubles as a stand for fumble-free access and effortless media viewing.*

COMMUTER SERIES®

Made for action, the Commuter Series® also provides multi-layered protection but in a slim form. A silicone mid-layer cushions the device while a sturdy polycarbonate shell adds reinforcement and provides a smooth, pocket-friendly finish. A self-adhering screen protector completes the protective package, guarding the display from scuffs and scratches.**

REFLEX SERIES™

Made for versatility, the Reflex Series® provides compact and lightweight protection along with easy access for accessory docking. Its ultra-slim single layer is a fusion of silicone and polycarbonate that snaps together for quick installation and removal. It also includes a self-adhering screen protector.**

IMPACT SERIES®

Made for fun, the uniquely simple yet surprisingly tough single-layer Impact Series® minimizes bulk while providing substantial protection. The robust silicone skin features inner coring that safeguards against bumps and scuffs. A self-adhering screen protector is provided to keep the display pristine.**
